Xemplar Drive - Family

Keeps your Family safe on the unpredictable roads

Golden Wheel Driving School has partnered with Xemplar Insights, a leading software company that develops risk management solutions, to bring their technology to help young drivers develop safe driving habits. Their product, **Xemplar Drive-Family** is a mobile app is installed on driver's phone and intelligently the driving performance across most common risks taken by drivers. We highly recommend that you consider this solution for your family member as they learn to drive and sharpen their skills. Follow simple steps noted below to get started.

Xemplar Drive curbs risky driving behaviors such as:

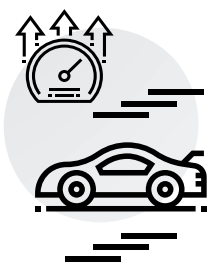

Distracted Driving

Distracted driving is the using of a smartphone that diverts attention away from driving. Xemplar Drive detects and reports phone usage while driving to help you coach them.

Speed Violations

Driving above the speed limit results in a speeding ticket or unanticipated road accidents. Xemplar Drive reports if a family member drives beyond the recommended speed limit to reduce fines and save lives.

Rapid Acceleration | Hard Braking

Staying alert to unpredictable road conditions, signs and other vehicles around you is key to maintaining a good distance and stopping safely. Assess these habits to help smoothen the drive and avoid crashes.

Unsafe Maneuvering/ Cornering

Sharp turns and changing lanes excessively at high speeds dramatically enhances the risk, as the center of gravity shifts rapidly. Get insights into such risky driving habits and coach teens to curb them.

How it works

The solution is two fold: a Web Portal and a Mobile App

Web Portal

The web portal is accessed by the parent/guardian via a web browser to review data gathered across the drivers.

Dashboard: Summary report of family member’s driving score, trends, unsafe driving habits, etc

Review Performance: Analyze each member’s driving habits in great detail to coach them on risks and improve driving behavior

Manage Account: Manage users, account settings and billing information

Send Notifications: Send messages to all mobile app users in your family from one location

Click Here to Sign-up and get 30% off No Long-Term Commitment.

Mobile App

The mobile app is installed on the driver’s smartphone and runs in the background

- **Self-Assess** driving habits that increase the risk of accidents Track with overall **driving score** over time to see improvement over time.
- Review completed trips along with **granular data** on unsafe events that occurred on a trip.
- Easily capture details and **report to parent** if a crash happens along with media files.
- Keep relevant information at your fingertips – **roadside assistance**, insurance card, etc.

The mobile app is installed on the driver’s smartphone and runs in the background

Your Next Steps

Step 1: Set up your Xemplar Drive - Family account from:

<https://tinyurl.com/xdrive-gwdriving>

Step 2: Log into the secured web portal and activate the account by providing your billing information

Step 3: Add the drivers in your family to the web portal

Step 4: Receive instructions on how to download and use the app
